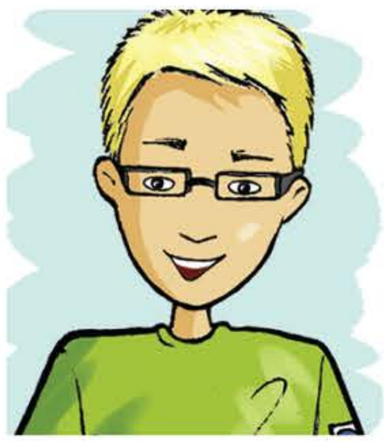
Kid's Box is an exciting new ezine for young people. Let's meet the writers, Dan, Alvin and Shari. They all go to the same school. It's called 'City School'.

Alvin

I'm eleven years old. I always ride my bike to school. I sometimes have breakfast in the school breakfast club before my classes. I love playing football and basketball. I'd like to write about sport and computers in the ezine.



Dan

I'm ten. I live in a village outside the town so I catch a bus to school every morning. I like singing and music. I love playing the guitar and the piano. I'd like to write about music and clothes in the ezine.

Shari

I'm ten. I live near the school so I walk in every day. I have lunch at school with my friends. I love drawing and taking photos so I want to put my photos in the ezine and write about the natural world.

1 What's *Kid's Box?*
2 How many writers are there?
3 Which school do they go to?

For our first ezine we went round our school to find out more about what we learn.

We all study these school subjects: Maths, English, Science, Music, Sport, Art and Computer studies.

Kid's Box reports

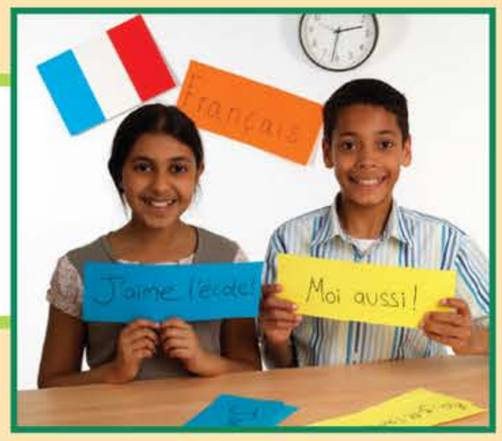
Our School

a

Older students have to study more school subjects and take important exams.

b

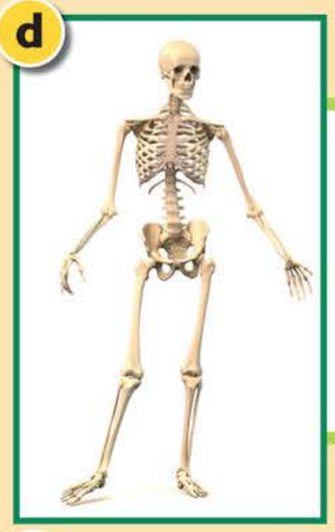
We study a second language. We can choose French, German or Spanish.



c

We use the dictionaries in the school library to help us to understand new words.

d



Science is an important subject so we do it every day. This year we're learning about plants and the human body.

e

In our Geography lessons we learn about different people and their countries.

f

The best subject is History. We love learning about the past!

We all agree that the best thing about school at the moment is the new ezine competition. We all want to win that prize!

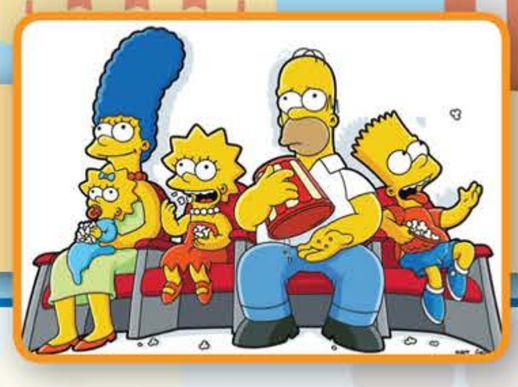
History Cartoons

FACT: ***The Simpsons*** **started in 1987. It's the longest running cartoon series.**



1 Ask and answer.

Do you watch cartoons? Who's your favourite cartoon character?

2 Look and say.

Do you know the names of these cartoons? Which characters are in them?

3 Read and answer.

Films and cartoons are made of lots of different images. In films the different images are called frames and in cartoons they are called cels. In a film there are usually 24 frames per second and in a cartoon there are 12 cels per second. Our eyes do not see the space between each frame or cel.

1 How many frames do you need for 15 seconds of film?

2 How many cels do you need for one minute of animation?

There are lots of different ways to make cartoons. The first cartoons were made using hand-drawn pictures. Today, some cartoons are drawn using cel animation. For these, artists have to draw pictures on clear plastic. This means that to change the cels they only have to redraw the parts of the picture that move.

Other cartoons, such as *Wallace and Gromit*, use models. Artists move the models and take a photograph. They have to take a lot of photographs!

3 Which method of making a cartoon do you think would take the longest? Why?

These days, most cartoons are made using special techniques with a lot of help from computers. Now, anyone can make a cartoon using cartoon-making websites. You could make a cartoon too.

Science Teeth

FACT: People cleaned their teeth with wood and animal hair before William Addis invented the first toothbrush in 1780.

1 Read and match.

Our dentist
We start going to our dentist when we are very young because dentists help us look after our teeth. Healthy teeth help us eat, speak clearly and look good.

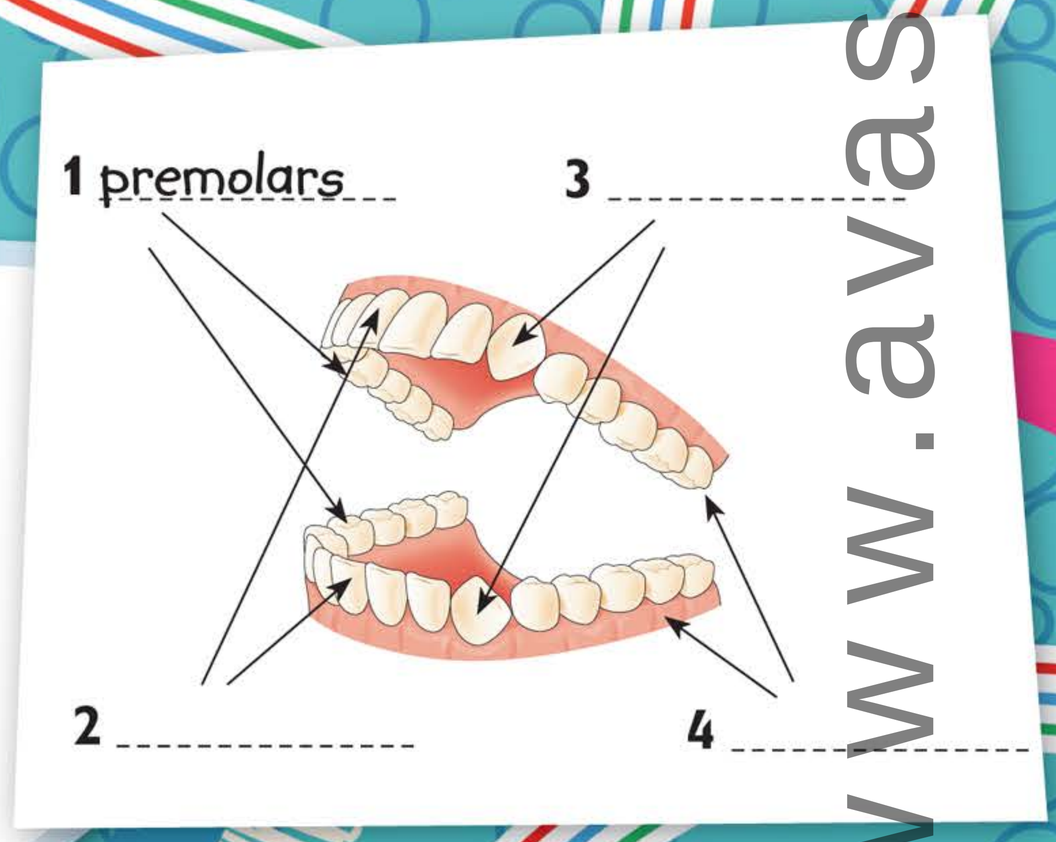
Our milk teeth
We get 20 milk teeth when we are between six months and three years old. Then we lose these teeth and get a permanent set of about 32 teeth.

Our permanent teeth
The first 28 permanent teeth come when we are between six and 13. The final four molars, or wisdom teeth, usually come when we are between 16 and 21. Not everyone gets wisdom teeth. Do you know if your parents have got theirs?

2 Read and label the diagram.

Our different teeth
We have four kinds of teeth which do different things:

- We have eight **incisors** at the front of our mouths. They're the sharpest teeth because they cut our food.
- The four **canine** teeth are next to the incisors. They hold and tear food so they have very long roots.
- Our eight **premolars** are behind our canine teeth. We use them to chew food so premolars are flatter on the top.
- The **molars** are at the back of our mouths. Molars are much bigger than the premolars. Their job is to chew food into smaller pieces so it can be swallowed.



3 Match the sentences with the picture.

Tooth structure
A tooth has two parts: the crown and the root.

1 The **crown** is the part we can see when we smile or open our mouth.
2 We can't see the **root** because it is in the gums. It is about two-thirds of the tooth's total length.
3 The hard white part that covers the outside of the tooth is called the enamel.

Tooth care

To have healthy teeth and gums, you must:

1 brush your teeth every day _after_ meals and _____ bed.

2 eat a good diet. You _____ eat sugary foods _____ meals. If you are _____ , eat an apple, banana or carrot.
Don't drink lemonade. Drink milk! If you eat between meals, _____ your teeth when you _____ .

3 visit the _____ twice a year. A dentist can clean your teeth _____ than you, so that your mouth is _____ .

5 Read and order the text.

How to brush your teeth

[ ] To finish, rinse out your mouth with water.

[ ] Always start and finish in the same place in your mouth.
A good place to start is the outside of the back molars, which need the most time and brushing.

[ ] All of that should take two minutes.

[1] Brushing your teeth is very important. It cleans your teeth and gums, and helps against cavities.

[6] Then repeat all of this on your bottom teeth.

[ ] Lastly, don't forget the top of your mouth and your tongue.

[ ] Next brush the inside of your teeth and gums using the same circular movement.

[ ] When you finish the inside and outside of your top teeth, quickly brush along the chewing part of your teeth.

[3] Gently brush the back molars and gums using a small circular movement. Then move slowly around your mouth brushing all your teeth.

Do a dentist's experiment.

You need:

- A toothbrush
- Toothpaste with fluoride
- 2 eggs
- Bottle of white vinegar
- 2 clear plastic cups

What to do:

1 Brush one of the eggs with fluoride toothpaste.

2 Put 10 cm of vinegar into both cups. Put the 'fluoride' egg into one cup of vinegar and the other egg into the other cup of vinegar.

What happens:

One egg starts to bubble as the vinegar (an acid) attacks the minerals in the egg shell. Which egg do you think is going to start to bubble?

1 Can you name these cities?

a

b

c

d

2 Read and answer 'true' or 'false'.

1 During the stone age, cavemen started fishing.
2 Cities started growing where there were markets.
3 Cities stopped growing because of the Industrial Revolution.
4 Four thousand people lived in Mohenjo-Daro 40,000 years ago.
5 London is smaller than New York.
6 The biggest city in the world is Tokyo.

3 Read and order the events.

a) London was the biggest city in the world. ☐
b) People started building cities. ☐
c) New York was bigger than London. ☐
d) Cavemen started farming. 1
e) Tokyo is the biggest city in the world. ☐
f) Rome was the most important city in the world. ☐

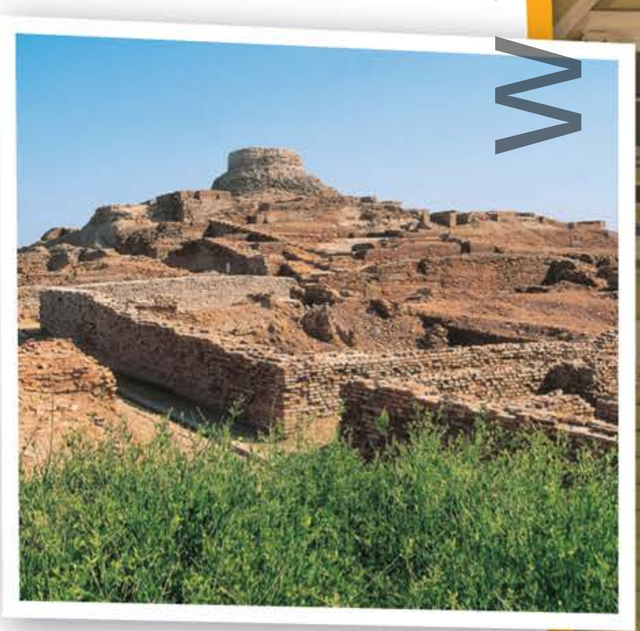
Why did the first cities start?

During the stone age, cavemen started farming. As they got better at farming, they started growing more food than they could eat. They bought and sold the extra food in markets. Cities started growing around these markets.

Living in cities made people feel safe. People often lived near castles and built walls around their houses. Two hundred years ago, cities started growing much faster. This was because of the Industrial Revolution. People went to work in the cities because there was more money.

Where were the first cities?

Mohenjo-Daro in the Indus Valley, in Pakistan, was one of the first cities. It was built more than 4,000 years ago. About 40,000 people lived there. If we look at a map of Mohenjo-Daro, we can see the streets were straight and that there were a lot of houses and big buildings.



About 2,000 years later, the biggest city in the world was Rome. It was the capital of the Roman Republic and Empire for a thousand years. About one million people lived there.

London was the first city to have more people than Rome. It was the biggest city in the world between 1831 and 1925. Then New York grew bigger. Now the biggest city in the world is Tokyo.

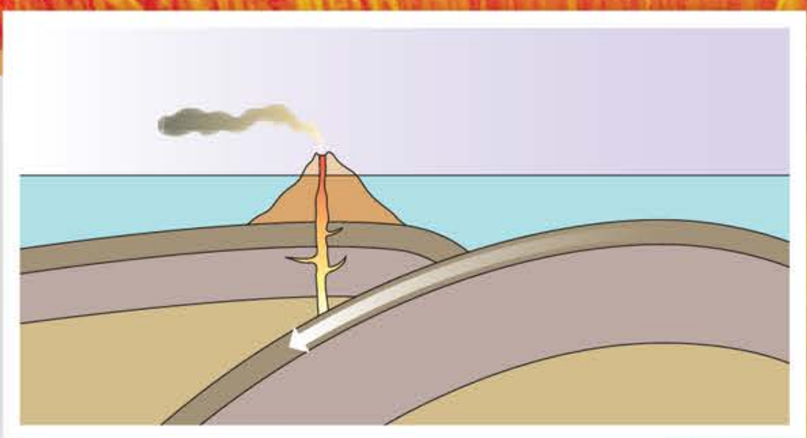
The Earth's surface

FACT: The word *volcano* comes from the Roman god of fire, Vulcan.



1 Read and answer.

1 What is the name for the outside of the Earth?

2 What are plates?

3 What does the Richter Scale measure?

4 Where are most tsunamis?

2 Read again and choose a title.

a) Plates and bowls

b) Natural disasters

c) Wave problems

3 Complete the sentences.

1 Two of the worst natural disasters are _____ and tsunamis.

2 The _____ of the Earth is a solid rock layer called the crust.

3 The crust has different parts which are called _____ .

4 People use a seismometer to _____ how strong the earthquake is.

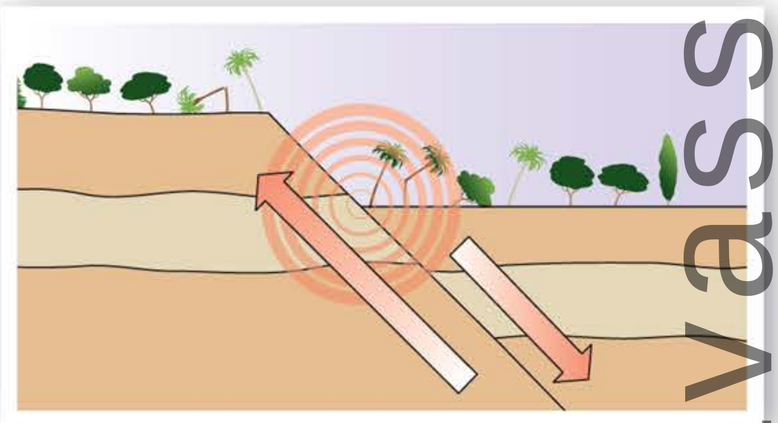
5 A _____ is a series of very big waves.

6 About _____ out of every ten tsunamis happen in the Pacific Ocean.

A natural disaster is the name we give to something that happens because of natural forces and not because of the actions of people. Two of the worst natural disasters are earthquakes and tsunamis. They happen when land moves.

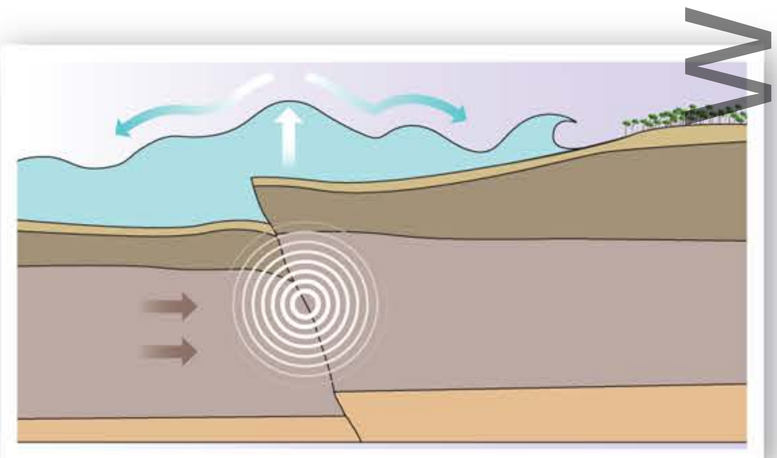
The outside of the Earth is a solid rock layer called the crust. The crust has different parts which are called plates. The line where plates meet is called a plate boundary. Earthquakes and tsunamis often happen on or near the plate boundaries.

Earthquakes



An earthquake is a sudden movement of the Earth's surface. The plates under the Earth are always moving slowly, but sometimes they stick and can't move until they move suddenly. This can cause an earthquake. People use a seismometer to measure how strong the earthquake is. A seismometer uses the Richter Scale when it measures an earthquake. The Richter Scale is numbered 0–10. Very bad earthquakes have a high number.

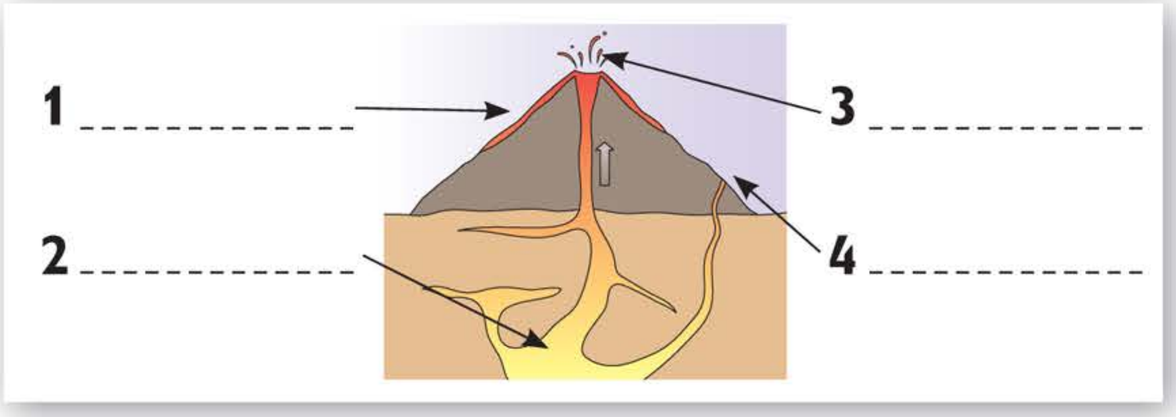
Tsunamis



A tsunami is a series of very big waves. Most tsunamis happen because of a big underwater earthquake. The earthquake must be over 6.75 on the Richter Scale. About nine out of every ten tsunamis happen in the Pacific Ocean. Tsunamis are different from normal waves because they move a lot more quickly and the distance between one wave and the next is bigger.

www.avasshop.ir

4 Read and label the diagram.



Volcanoes

A volcano is a mountain with a hole in the top. Volcanoes erupt when magma (liquid rock) from under the crust breaks through the crust. When magma reaches the Earth's crust it is called lava, but when it becomes cold, it forms rock. The bowl shape at the top of the volcano is called a crater, and the smaller holes in the side are called vents. The biggest volcano is Mauna Loa in Hawaii. It is about 10 km tall from the sea floor to its top.

Make a volcano.

You need:

- A water bottle
- Tape
- Card (60 x 60 cm)
- Newspaper
- Flour
- A bowl
- Paint
- Scissors

How to make the volcano:

1 Cut the top of the water bottle off. Tape the bottle to the centre of the cardboard.

2 Make newspaper rolls and balls to stick around the bottle.

3 Mix water and flour in the bowl to make glue. Tear the newspaper and put it into the glue.

4 Put the newspaper over the rolls to make the shape of the volcano. Don't cover the top of the bottle.

5 Wait for the paper and glue to dry completely. In the next class, paint your volcano.

Every day we throw a lot of plastic into our bins. This is a problem because plastic does not change. This means that it uses a lot of space if we don't reuse it or recycle it. Did you know that half of the rubbish on our beaches is made of plastic?

2

Making plastic also uses a lot of oil. We need to use oil for two things. First we use it as the basic material for plastic and second we use oil for energy to make the plastic. Because of this it is important to try to recycle different plastics. What do you recycle?

3

Celluloid was one of the first plastics. It is made from cotton (the material which jeans are made of) and two other materials. People use celluloid to make films.

Another important plastic is nylon which people use in lots of different kinds of clothes. The word nylon comes from the names of two cities, New York and London.

Today the plastic which we use most is called polyethylene. We use it for bottles and boxes.

4

We use plastic for almost everything. Think about what is around you and what you use every day. How many plastic things can you think of?

Recycling plastic

It's not easy to recycle plastic because there are hundreds of different types. How often do you drink from plastic bottles? Here are some of the things people do to recycle them.

1 First, a special machine sorts the bottles so that all of the bottles made from the same materials are together.

2 Then another machine squashes the bottles.

3 Next, another machine cuts the bottles into very small pieces.

4 Then they wash the pieces.

5 Next, they put the plastic into bags, ready for recycling.

6 Finally, they melt the plastic and use it to make lots of new things. Sometimes they use it to make new plastic bottles!

Project

Make a photo frame.

You need:

- An empty CD box you can reuse
- A photo
- Scissors and glue or tape
- Things to decorate the frame

How to make the photo frame:

1 Open your CD box and take out the paper and the plastic piece where the CD goes.
TIP: Take the cover off the CD box and turn the base on its end. Then put the cover on the back of the base. The box will now stand up on its own.

2 Cut the photo to the right size.

3 Decorate the front of your frame by gluing different objects onto it. You can use stamps, old toys, flowers or anything you want.

4 Put your photo inside the frame.

Pizza

a

First we made the base. The base is made of dough. We put some flour, yeast, salt and water into a bowl and mixed them well. Then we left the dough for an hour so it could grow.

b

Then we put tomato, cheese, salami sausage and onion on top of the base. Then we added some black pepper and cooked it for 15 minutes.

c

When it was ready, we put the pizza onto a plate. Mario uses special plates in the restaurant. They're very big and they're made of wood.

d

You can eat pizza with your hands, but you need to cut it with a knife first. This one is round but pizzas can also be square.

Art Optical illusions

FACT: Our eyes and brain can't always understand everything. How many legs has this elephant got?

1 Look and read. Answer the questions.

When we look at something, light travels from the object to our eye. The eye sends messages to the brain and the brain tries to understand the message. Because the brain can't understand everything, it tries to make things simpler or easier for us to understand. Some artists play games with this and create paintings and pictures which use 'optical illusions'. An optical illusion makes us believe we can see one thing when really we see something else.

Look at these paintings. Which one do you prefer?

Donald Rust painted this picture. It is called *Bison*. Bison are big animals, similar to cows. We can see there are some bison in a field, but when we study the picture more carefully we can find some more.

How many bison are there? Where are they?

This painting is by Salvador Dali and is called *Mae West*. At first sight it looks like a woman's face, but if we look more closely, her face looks like a room with a red wall and a floor which is made of wood. Her hair looks like curtains.

What do her eyes, nose and mouth look like?

The painting on the right is called *The Human Condition*. It was painted by Rene Magritte. Look at it very carefully.

What can you see?

When we look at it the first time, we think we are looking out of a window, but when we look at it more carefully we can see that there is a painting in front of the window.

What can you see in the painting?

Project

Make an optical illusion.

You need:

- A pen
- Glue
- White cardboard
- Scissors
- String
- Coloured pencils
- A compass

How to make the optical illusion:

1. Draw two circles on the cardboard.
2. Cut the circles out. On one circle, draw and colour a piece of cheese. On the other, draw a mouse. Colour them in.
3. Glue the circles together. Make one small hole at the top and one at the bottom.
4. Put some string through each hole and make circles with it.
5. Spin the disc quickly and watch the mouse and the cheese. They're in the same place.

Two of the world's most famous endangered animals are also famous for their stripes. They are mountain zebras and Siberian tigers. They need big forests to live in, but these forests are smaller nowadays because people cut trees down for wood.

To help protect the tigers in Russia they made two National Parks. These also protect them from people who want to catch them for their beautiful striped fur.

This is the Banggai Cardinalfish which lives around the islands of Indonesia. It is easy to see because of the spots on its tail and its striped body. They are in danger because people collect them.

Science Extinction

FACT: Some scientists think that in the last 600 years more than 44,000 different insects have become extinct.

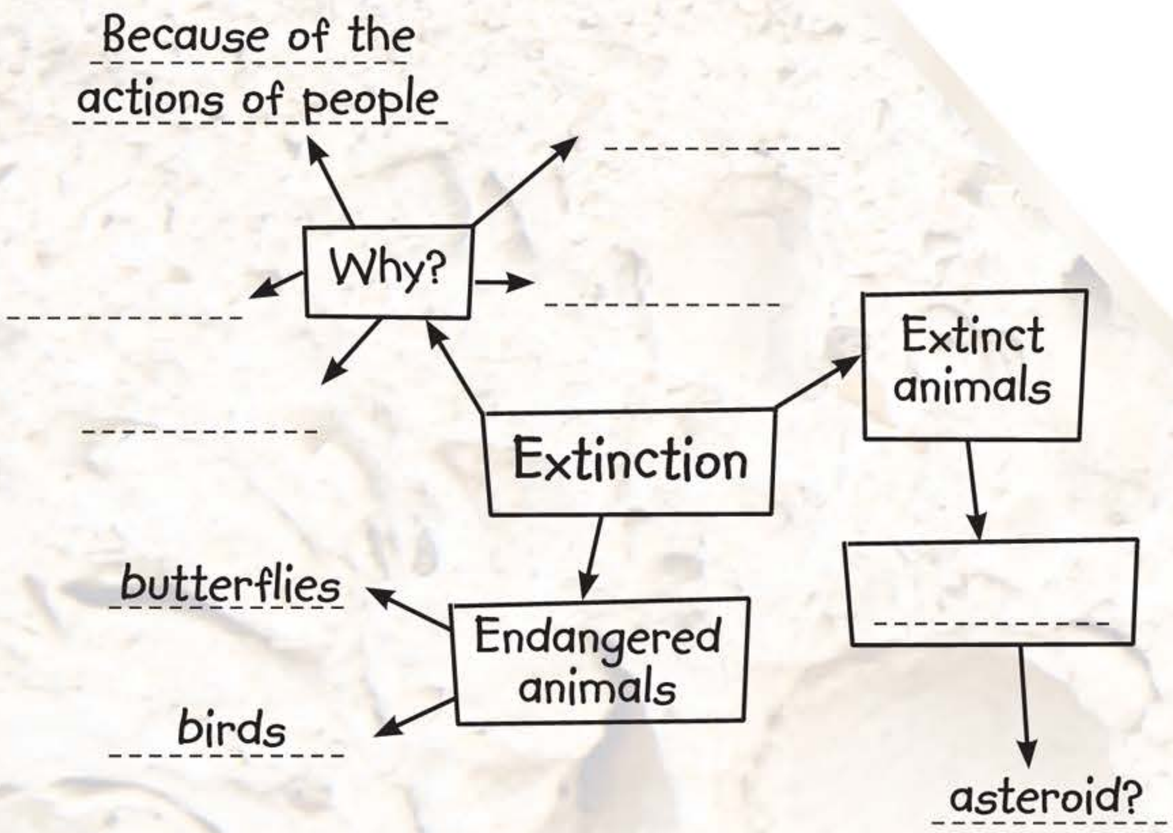
1 Read and answer.

1. Give three reasons why animals become extinct.
2. When did the last dinosaurs die?
3. Why did big animals become extinct?
4. What did the asteroid do?
5. What happened to the weather?

2 Read again and find words that mean:

1. a family of animals
2. when an animal family dies
3. a big rock from space
4. when the Earth moves
5. the opposite of die

3 Make a mind map.



Extinction

Animals can become extinct when all of their species or family die. When an animal family is in danger of extinction we call it an endangered species.

A species can become extinct because of many different things:

- more animals eat it
- sudden changes in the weather
- natural disasters
- new diseases
- the actions of people

The most famous extinct animals are the dinosaurs which died out more than 65 million years ago. People have different ideas about why the dinosaurs became extinct.

Before they became extinct there was a lot of plate movement. This means that there were volcanic eruptions, earthquakes and tsunamis, and changes in the sea level. The Earth also got colder. These things killed a lot of dinosaurs, but something else happened which killed all animals over 25 kg and a lot of smaller plants and animals.

The most popular idea is that an asteroid, a very big rock from space, hit the Earth and made a big hole. It also started a lot of fires, earthquakes, tsunamis and storms. The weather became colder so a lot of plants died. Bigger animals didn't have anything to eat, so they couldn't live.

www.avaasshop.ir

4 Read and match.

We know about dinosaurs because of fossils. Fossils are made from old bones or parts of animals or plants which change into rocks over a very long time. The most important fossils are from parts of the body or from footprints.

Fossils include:

1 Bones: These fossils are the most important when we want to learn about dinosaurs. Archaeologists found the first dinosaur bone in 1818 and they find more and more every day.

2 Teeth: These tell us about what things different dinosaurs ate.

3 Eggs: Archaeologists found the first fossilised dinosaur eggs in France in 1869.

4 Skin: Some dinosaurs had hard thick skin, like crocodiles.

5 Footprints: Dinosaur footprints were normally made in sand. They are important because they tell us about different things, including:

- how big and how fast a dinosaur was
- if the dinosaur walked on two or four legs
- the bones in the dinosaur's foot.

5 Find out more.

Sports for all seasons

a

Athletics is a sport which we usually do outside. It's difficult to do in the cold and rain so, at school, we do athletics in the summer.

b

Lots of adults play golf in the summer, but they can play it in the winter too!

c

d

e

We can only do some sports in the winter because we need snow and ice. A lot of people enjoy skiing in their winter holidays. Today a lot of young people like snowboarding too. Sledging is also very good fun in winter. You can sledge down a hill.

f

There are other sports which you can play in any season. In England and most of Europe the football season starts in the autumn, when the summer finishes. People play it in the autumn, winter and spring. Football is also played in the summer when the World Cup and other special tournaments are on.

The dates for the seasons are different in different parts of the world. In Europe, North America and Asia spring is from March to June, but in Australia, Africa, India and South America it is from about September to December.

Art — Olympic design

FACT: The Olympic Games happen every four years. 204 different countries competed in the 2012 Olympics in 26 different sports.

1 Read and match.

1 Can you see the picture with five different coloured circles? This is called a logo. It is for the Olympic Games. The circles represent the five different continents of the world.

2 Each country also has another logo for its games. The Beijing 2008 logo shows a person dancing. This was the old logo for the city, but it also represents all the different sports at the Olympics.

3 The picture for London plays with the numbers 2012. It is a modern picture, because people wanted young people to watch the games and do more sport.

4 The logo for Rio 2016 shows three people and uses the three colours of Brazil's flag. The shape the people are making looks like Sugarloaf Mountain in Rio. Do you like it?

2 Ask and answer.

1 What's a logo?
2 How many circles are there in the Olympic logo? Why?
3 What's the person doing in the Beijing logo?
4 Which city uses numbers in its logo?
5 What colours are used in the Rio logo for 2016? Why?
6 Which is your favourite logo? Why?

Project 1 — Design your Olympic logo.

Work in groups. Imagine the next Olympic Games are going to be in your city.

1 Think of a design for a logo.
2 Make a poster to show your design.
3 Show the class and decide on the best logo.

3 Read and answer.

1. How big must the Olympic medals be?
2. How much silver is there in the gold and silver medals?
3. Who is on the front of the Olympic medals?
4. Who decides what goes on the back of the medals?
5. What was on the back of the medals for the Beijing games in 2008?
6. What colour is jade?

How are the Olympic medals made?

Each Olympic medal must be at least 68 mm across and 3 mm thick. The gold and silver medals must be at least 92.5% silver. There are six grams of 24-carat gold covering each gold medal. The bronze medals contain a mixture of different metals including silver.

The front of the medal

Since 1928, there has been a picture of Nike, the Greek goddess of winning, on the front of every medal.

For the 2004 games in Athens a new front was designed. It had a new picture of Nike flying into the Greek stadium to give the winners their prizes.

The back of the medal

The back of every medal is different for each Olympic Games and is designed by the city where the games are. The medal for the Beijing 2008 Olympic Games had a circle of a green precious stone called jade. Jade is important in China because it means something is beautiful and excellent. The top of the medal looks like a dragon which shows somebody is strong.

Project 2

Design an Olympic medal.

You need:

- A piece of card
- A compass
- A ruler
- A pencil and pens
- Glue
- Scissors
- String or ribbon

How to make your medal:

1. Draw two circles on a piece of card. Use a compass to make them exactly 68 mm.
2. Cut out the circles.
3. Draw the goddess Nike on one circle. This is the front of the medal. Then draw your own design for the back of the medal on the other circle.
4. Glue the circles together and use the compass to make a hole at the top.
5. Put string or ribbon through the hole to finish your medal and show it to the class.

People who help us

1 Read and answer the questions.

1 How did Holly break her leg? 2 Why did she hit her head? 3 Who helped her?

Holly's heroes

It's a rainy day and there are grey clouds in the sky. Holly's walking to school. She's got a history exam. A lot of young people might feel unhappy or worried, but not Holly. Holly's just happy she can walk to school.

Last year Holly was in hospital for four weeks and she had to learn to walk again. We ask Holly about her heroes.

So, Holly, can you tell us what happened to you last year?

I was riding my bike home from my friend's house after school. It was dark and I didn't have any lights so I couldn't see clearly. I was going very quickly down a hill when suddenly a cat ran across the road in front of me. I tried not to hit it, but I fell off my bike.

How terrible! Then what happened?

Well, I can't remember. I hit my head because I wasn't wearing a helmet. People told me what happened. I fell badly and broke my leg in two places.

How did you get to hospital?

A driver saw me on the ground and stopped his car. He phoned for an ambulance and they took me to the nearest hospital. I arrived in less than ten minutes.

Wow! That was fast.

Yes. Thanks to them, the doctors and nurses could work quickly. They had to operate for four hours but they saved my leg. Then I had to learn to walk again.

So you've got a lot of heroes: the ambulance drivers, and the team of doctors and nurses.

Yes, but also the driver who stopped to call the ambulance. I want to say thank you to everyone who helped me. When I grow up, I want to be a doctor or nurse because I'd like to help other people too.

Tell the truth but don't hurt

1 Read and choose answers.

1 ***Your friend's got a new haircut and you think it looks awful. When he asks you what you think, you say:***

a) *'It looks terrible. I don't like it.'*

b) *'It's OK but I prefer the old haircut.'*

c) *'It looks great. It's perfect for you.'*

2 ***Your mum spent all afternoon making a special dinner, but you don't like it. What do you do?***

a) *You eat it and ask for more.*

b) *You make a horrible face and say you don't want to eat it.*

c) *You tell her that it's nice, but it's not your favourite meal. Suggest a meal that she can make more quickly and easily.*

3 ***You're shopping with a friend who wants to buy a new dress. She tries on a dress that looks awful on her. She asks you what you think. What do you do?***

a) *You say the dress doesn't look very nice and you find a different dress for her to try.*

b) *You say that the dress looks lovely and tell her to buy it.*

c) *You tell her the dress looks horrible and you're bored with shopping.*

4 ***A new boy in your class invites you to play tennis on Saturday afternoon. You'd like to go to the cinema with some friends. What do you do?***

a) *You say, 'Sorry, I can't. I want to go to the cinema with my friends.'*

b) *You make a horrible face and say, 'I hate tennis!'*

c) *You smile and say, 'Thanks very much but I want to go to the cinema with some friends on Saturday. Would you like to come with us?'*

5 ***You've got a friend who sometimes smells bad after the sports lesson. What's the best way to help him?***

a) *Make a horrible face and say, 'You smell bad. Have a shower!'*

b) *Give him a box of shower gel and deodorant for his birthday.*

c) *Talk about him with the other students and laugh.*

6 ***Your dad hasn't got a job. He lost it last year and your parents are worried about money. It's your birthday soon and you want a big party, but your parents say that you can't have one this year. What do you do?***

a) *You tell your parents that you understand and it isn't important.*

b) *You get angry and stay in your room all day.*

c) *You tell your parents that you understand. You ask your friends to bring some lemonade and crisps to the park, so you can have a small party.*

2 Talk about your answers with your friend. Are they the same or different?

3 Discuss these questions.

1. Is it important to always tell the truth?
2. Are there some situations where it's OK not to tell the truth?
3. How can we say things to help our friends and not hurt their feelings?

Value your friendships

Dear Betty and Robert

Dear Betty and Robert,

I work really hard at school and I always study a lot for my exams, but I don't get good marks. I don't fail, but I get 5, 6 or sometimes 7 out of 10.

My best friend, Emma, gets the best marks in the school, but she cheats. She takes photos of the book on her mobile phone and uses them in the exams. I'm really unhappy about this.

Should I do the same as my friend and get better marks or should I tell the teacher that she cheats in exams? Please help me to decide.

Yours,

Richard

1 Does Richard work hard at school?
2 Does he get good marks?
3 How does Emma cheat in the exams?

Dear Richard,

When you work hard at school and study for your exams, you are learning things. I'm sorry that you don't get the good marks that you want. It's better to work hard and learn things than cheat and learn very little. It's not a good idea for you to do the same as Emma. You should feel good because you're passing your exams. Do your best and don't worry about other people's marks.

This situation is difficult. You don't have to tell the teacher that your friend is cheating. Emma can't always cheat – one day someone is going to catch her.

Yours,

Betty and Robert

4 What do Betty and Robert think about cheating?
5 Do they think that Richard should get the same marks as other students?

2 Discuss these questions.

1 Is Sarah right to be unhappy? Why?
2 What do you think Katy should do?
3 What do you think Sarah should do?

Dear Betty and Robert,

I'm really unhappy because I've made a big mistake with my best friend, Sarah. There's a group of very popular girls in my class. They're cool and funny and everyone wants to be friends with them. They asked me to go out with them last Saturday. I was really excited, but it was Sarah's birthday.

I didn't go to Sarah's party and now she's unhappy with me. Now she doesn't want to be my friend. I've started to see that the popular girls are boring and unkind, and I don't like going out with them. I want to be Sarah's best friend again. What should I do?

Yours,

Katy
