NAME: _____

Reading

J:Read and write true or false.(4)

The magnificent redwood trees are some of the largest trees in the world! They are found mostly in Northern California where cool temperatures, misty rains, and dense fog allow them to grow.

Redwood trees can live thousands of years. The oldest of these trees can grow to over 300 feet tall. Some rise higher than the Statue of Liberty! A few are so wide that roads can be built through them.

Redwoods trees are preserved in California's Redwood National Park. Every year, nearly a million visitors go to see the giant trees. Others just like to drive along the 33-mile-long Avenue of the Giants, a road that winds through the park and surrounding areas.

1: Redwood trees can...

A: live a very long time.

B :live without water.

C:live about as long as a person.

D:stop growing at 100 feet tall.

2:Redwood trees grow...

A: where it is hot and dry.

B:everywhere in the United States.

C:where it is icy cold.

D:where it is cool and misty.
