F. Write the words.

(E-t-b-s) (U-e-m-s-u-m) (D-n-r-a-o-u-l-s) (c-r-e-s-m-a) (C-a-r-s-y) (H-l-e-p)

G. Read the passage and answer the questions.

There are nine planets and they all go around the Sun. we call the planets and the Sun "the solar system". The first planet, next to the Sun, is Mercury. It is 58 million kilometers from the Sun. Venus is the second planet from the Sun, and our planet, the Earth, is the third. It is 150 million kilometers from the Sun. it is between Venus and Mars.

On Earth we have air and water for the animals, trees and flowers, and us. These things can only live on Earth – the other planets in our solar system do not have air and water. But out in space there are other solar systems and perhaps there are other planets with air and water. Perhaps there are animals or people on these planets.

1. What's the nearest planet to the Sun?
2. What are two things that are important for life on a planet?
3. What's the solar system?

True or False?

1. Earth is nearer to the Sun than Mars.

Family and Friends 4 Unit 1-7

2. Earth is not the only planet with life in our solar system.

H. Writing.

What will life be like in 100 years?

. The best trip you have ever taken.

. how to make a delicious omelet.

[illegible]
