Driving, Safety, and Your Cell Phone

Many accidents occur every day simply because drivers fail to pay attention. One thing that takes drivers' attention away from the road is talking on cell phones.

Because talking on cell phones can cause accidents, in some places it is illegal to hold a cell phone while you are driving. Many people use headsets so they can talk on the phone and keep both hands on the steering wheel.

However, studies show that using a headset while driving does *not* reduce the chance of having an accident. In fact, people using headsets have as many accidents as people using handheld cell phones. The reason is this: When people talk on the phone, they are not concentrating on what is happening on the road and around them. They can see

everything, but they aren't really paying attention, and they aren't focused on driving. Drivers who are talking on the phone are slower to respond to things like stop signs or a person walking into the street.

So keep your attention on the road and stay off the phone. Remember that driving requires your full attention. But if you must use your cell phone while driving, here are some safety tips:

- Use your cell phone only if it is absolutely necessary.
- Tell the person you're speaking to that you're driving.
- If possible, pull over to the side of the road when making or answering a call.
- Keep your conversation short.

	true	false
<u>Example:</u> Drivers who talk on cell phones have more accidents than drivers who don't.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(1) Drivers who hold their cell phones have more accidents than drivers who use headsets.	<input type="checkbox"/>	<input type="checkbox"/>
(2) If you talk on the phone while you are driving, you can't see everything on the road.	<input type="checkbox"/>	<input type="checkbox"/>
(3) When a person talks on the phone, he or she isn't completely paying attention to driving.	<input type="checkbox"/>	<input type="checkbox"/>
(4) A driver who is talking on a cell phone can't respond to things as quickly as a person who isn't talking on the phone.	<input type="checkbox"/>	<input type="checkbox"/>

Name: _____

ID: A

- (5) You should never pull over to the side of the road when making or answering a cell phone call while driving.
- (6) Holding a cell phone when you drive is illegal no matter where you are.
- (7) Drivers who aren't focused on driving have more accidents than those who are.
